

Can you help with our research?

We are looking for people to take part in a
Falls Prevention Study

ARE YOU.....

-Age 65 years and over?

-Had a fall in the last 12 months or worry about falling?

-Willing to receive a home visit from an occupational therapist?

Living in the Sheffield area
(postcodes S1-14, and S17, 20, 35 and 36)

Falling is a common problem in older adults. **People often think** that falls are an unavoidable result of getting older and **that little can be done to stop them.**

It may not be possible to stop falls completely but **there are ways to help reduce the number of falls** someone has.

Researchers are inviting **male and female adults over the age of 65 to take part in an exciting new study** which is being organised locally.

We hope to find out whether a **home assessment and modification** by an occupational therapist can help **reduce the number of falls older people have.**

If you are aged 65 or over and not already had an Occupational Therapy Assessment, you may be able to take part in this study.

If you are interested in finding out more please call the University of York OTIS team on **0800 9150668 (Free-phone)** or **Ali Madden-Fitzgibbon 0114 271 6576** to discuss if you are suitable for the study.

Thank you
